

## HALIMA AHMED

LECTURER B -  
MATHS DEPARTMENT |  
BOLTON COLLEGE

Halima has taken part in several Multiply Provider Support Programme sessions including:

- Maths Tutoring Skills
- Finance & Debt
- Numeracy Confident
- Healthy Independent Living
- Family Numeracy

### WHAT HAVE YOU ENJOYED ABOUT THE MULTIPLY PSP SESSIONS YOU HAVE TAKEN PART IN?

I have enjoyed the open collaboration of the Multiply Provider Support Programme, which welcomes providers of all types across Greater Manchester. Interacting with different maths practitioners has given me new ideas and perspectives that have helped me develop my own best practice.

### HOW HAS THE MULTIPLY PSP HELPED YOUR OWN PRACTICE?

I have improved my confidence in delivering maths sessions and developing resources. This confidence has helped me progress in my career. The Multiply sessions have given me insight to see different way that maths can link into different subjects e.g. diet can be used to embed maths into health and fitness programmes for sports students.

### WHAT HAVE YOU TAKEN BACK TO YOUR COLLEAGUES FROM THE SESSIONS?

My team and I have looked at the ideas and resources from the Multiply sessions and stripped them apart to develop them further to meet the needs of the students. The resources and best practice have been integrated into the wider maths curriculum within the College.

I am planning to train my colleagues who will be delivering Multiply sessions to learners such as family numeracy.
